Safety Director: Justin Ruiz

Safety Memorandum: Proper Hazardous Waste Disposal

The purpose of this memorandum is to clarify how the hazardous waste regulations for universal waste and recycling apply to solvents, automotive, flammable, electronic hazardous material. When it comes to waste handling requirements, hazardous waste recycling regulations, and other CFR Subtitle provision please keep in mind they are designed to keep **Our** employees as well as your employees safe. By clarifying how recycling is regulated, Classic Recycling hopes to both remove any uncertainties for the industries we service and about the regulatory status of these materials and processes to ensure that this critical step is done safely and in compliance with State regulations. To properly dispose of these materials, you are required to schedule a special pick-up with your carter. Depending on the material being disposed of you will need to reach out to a certified special waste drop offsite. Classic Recycling only transport pickups for e-waste, appliances, furniture and demolition debris. The following material you are responsible for disposal, solvents, aerosol, biohazards, paint, industrial chemicals. Please see form attached for clarification.
